PRESSURE VESSEL CODES & REGISTRATION

- Designed and constructed in accordance with the ASME Section VIII, Division 1 Code
- Registered with the National Board of Boiler & Pressure Vessels Inspectors
- Complies with NFPA 58
- Conforms to specifications set forth by the Railroad Commission of Texas

VESSEL FEATURES

- Tanks fully fitted with RegO valves and Rochester liquid level gauges
- Dual service options for aboveground or underground applications
- Product supplied with steel dome (custom colors available upon request) or plastic AG/UG shroud, specify at time of order
- Container pressure rated at 250 PSI @ 400°F
- Vacuum purged
- Stainless steel data plate
- Anode bolt connection located under the dome
- #54 liquid level outage valve orifice

PROCESS CONTROL

All welded products are x-rayed and pressure tested @ 325 PSI per ASME Sec VIII, Div I requirements, followed by rigorous leak test inspections, both pre and post valving

STORAGE & DISTRIBUTION

Contact Propane Education & Research Council for additional resources and information at propane.com

PAINT SPECIFICATIONS

At the time of order, customer must specify intended application thus determining paint applied at the time of manufacturing

Aboveground tank applications:

- Painted Sky White with super durable TGIC polyester powder paint for maximum rust protection
- Custom colors available upon request
- If an aboveground painted tank is intended for underground use, tank must be field painted for such application

Underground tank applications:

- Painted gray with a “ready to bury”, durable epoxy powder paint for underground applications
- Product used underground may require additional protective coating and cathodic protections, contact your federal, state or local authorities for specifications

Made With Pride
Made In the U.S.A.
† Federal, state or local regulations may contain specific applicable requirements for protective coatings and cathodic protection. The purchaser and installer are responsible for compliance with such federal, state, local and NFPA industry regulations, including, but not limited to, proper purging prior to putting into service. Cathodic protection is required. Coating(s) must be continuous, uninterrupted and must comply with local, state or national codes or regulations.
