

B-Series Portable Cylinders

Manchester Tank's portable cylinders are designed and constructed for the transport and storage of liquid and gas materials anywhere in the world. Our cylinders comply to the U.S. Department of Transportation (DOT) and Transport Canada (TC) regulations.

Promoting hazardous material handling is the most obvious benefit of a solid, reliable system. Manchester Tank's vessels not only safely store and transport hazardous materials, these durable packages are built for reuse, so you no longer have to dispose of your investment.
